CIRCADENCE

PROJECT ARES®

For Individual Learners

LEARN BY DOING:
Build Cybersecurity Skills

Circadence's Project Ares is an award-winning, immersive, gamified cyber security learning platform. Interactive, hands-on cyber scenarios teach students, cyber enthusiasts, career changers, and IT generalists critical cyber skills and concepts to build competencies that help them thrive in the workplace.

Whether a cyber 'newbie' or seasoned pro looking to brush up on cyber skills (and learn new ones), Project Ares single and multi-player exercises mirror real-life cyber incidences to effectively prepare individuals for a successful career in cyber security.

Benefits of Project Ares

Build and hone skills
Acquire relevant competencies to improve job performance and/or nail the next job interview.

Improve learning retention
IT staff, career changers, and students can learn cybersecurity basics.

Expand professional cyber expertise
Take the reins of your cyber career development to upskill professional proficiencies.

Enter and advance in the cyber workforce
Demonstrate your cyber abilities with confidence.

Work Role Learning Paths	Cyber Defense Infrastructure Specialist Cyber Defense Analyst Systems Security Analyst Threat Warning Analyst Team Lead	
Note	Project Ares is also available in two additional subscriptions designed for organization and institutions. The Academy Plus and Enterprise subscriptions provide additional features including Trainer View Tools for team and classroom reporting plus Mission play coaching and mentoring. Visit *www.circadence.com/project-ares* for more information.	

Media Center

Cyber resources: **The latest intel on modern threats.** Kickstart your cyber learning with 100+ hours of material in a curated collection of documents, web resources, and videos for all things cyber.

Cyber Learning Games

Learn concepts: **Perfect your understanding of the basics.** Master essential cybersecurity concepts with fun, arcade style games that teach cyber kill chain, ports and protocol, regular expression techniques, and more.

Battle Rooms (fundamental scenarios)

Practice makes perfect: **Hands-on in a virtualized cyber range.** Build your skills in a series of multilevel learning challenges to reinforce cyber skills including Linux, scripting, and forensics.

Mission Play with Leaderboard and Team Chat (specialty scenarios)

Learn by doing: **Develop the critical thinking needed to defeat real threats on the range.** Gain confidence as you solve more complex problems in offensive & defensive missions. Individual and team-based play includes network recon and confronting threats like botnets, phishing and exfiltration, ransomware, and many more.
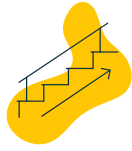

Athena, the In-Game Advisor for Mission Play

Get help: **Need a tutor? Athena is ready to answer your questions.** Progress through tight spots in your mission with guidance from Athena. Her suggestions are based on common questions asked across the Project Ares community.

Scores and Reports

Analyze and assess: **Evaluate skills to improve scores.** Check out performance in session playback. Look at the hints used and identify the activities that need more practice. And use assessment reports to stay on track to complete work role learning paths.

Experience Points

Level up: **Gain experience points while improving cybersecurity skills.**
As you progress, collect all the skill badges and earn a coin the first
time you complete each mission successfully.

Global Chat

Create Connections: **Join a community of Project Ares players.** Chat
about cybersecurity issues, in-game challenges, and leaderboard stats.
Learn together

Work Role Learning Paths

Align and Identify: **Measurable Learning Objectives** are tied to NIST's
NICE framework and work roles to support skill gap analysis.
