

Circadence Presents
Microsoft Security
Immersion Workshops

Get Hands-On Training with Microsoft Security Products

As cloud security threats become more pervasive, is your company at risk? Did you know that integrated tools provided a stronger solution for rapid and more accurate threat detection and response?

Security Immersion Workshops provide a **realistic** way to **learn** Microsoft Security products. Join an Into the Breach workshop and you will step into the role of a Cyber Defense Analyst. Using M365 cloud security tools you will investigate indicators of an advanced attack on your network across multiple phases of the kill chain

This is not a click through demo. The Into the Breach workshop is a realistic network breach simulation that challenges you to identify indicators of a compromise, determine the impact of the attack, and mitigate any additional threat activity.

Presented on an **immersive, gamified cyber range**, you'll have fun while experiencing the benefits and power of Microsoft 365 Defender and Sentinel tools.

Gain hands on experience while testing your knowledge of these Microsoft products:

- Microsoft Sentinel
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Endpoint
- Microsoft Defender for Office 365
- Microsoft Defender for Identity
- Azure Active Directory

Quickly build security skills and increase product adoption

| AUDIENCE | DURATION | DELIVERY | EXPERIENCE LEVEL |
|------------------------|--------------------------------|----------------------|---|
| Security Professionals | Min - 3 hours Max - 5 hours | Virtual In Person | Some familiarity with incident response |
